

Project 300 Proposal

Topic: Stylogenetics

Topic Category: Information Retrieval and Machine Learning

Stylogenetics in a nutshell:

Its a way of analyzing written text to know about the writer or the author. Generally to analyze things that is often included by the writer in his writing unconsciously, things like gender, age, geographic location, religion, personality, hobby, characteristics, even any chronic disease etc.

This information retrieval process can be automated by via Machine Learning.
